Publication fees for open access journals – work flows at Helmholtz Centres

Publication fees for open access journals – work flows at Helmholtz Centres

AGENDA

1. Frame conditions

2. Implementation in Helmholtz Centres

3. Funding Open Access – but how? Praxis examples
1. Frame conditions

- 22.10.2003 – Berlin Declaration on Open Access to Knowledge in the Sciences and Humanities.

- 27.09.2004 - Agreement of the Assembly of Members: "Publications from the Helmholtz Association shall in future, without exception, be available free of charge, in so fare no conflicting Agreement with the publishers or others exists."

- Rules for good scientific practice (Regeln guter wissenschaftlicher Praxis)

- Recommendations of the Deutsche Forschungsgemeinschaft „Vorschläge zur Sicherung guter wissenschaftlicher Praxis“

- Regulation for publication according to the Helmholtz Center
2. Implementation in Helmholtz Centres

Within the publication process there is one point more:

→ Publication fees for Open Access publications

Ways to organize the funding:

- Central publication fund, administered by the library (or by other departments)
- Decentral funding by the scientific units
- No funding at all

Conditions for funding by the Helmholtz Centres should be:

- Corresponding author must be a member of the Helmholtz Center
- Journal must be a Gold Open Access Journal, not a hybrid journal
- No budget is available within a project
3. Funding Open Access – but how? 4 Praxis examples

3.1. Deutsches Elektronen-Synchrotron DESY Hamburg

3.2. Forschungszentrum Jülich

3.3. GSI Helmholtzzentrum für Schwerionenforschung Darmstadt

3.4. Helmholtz-Zentrum Dresden – Rossendorf

Hermann von Helmholtz
(1821 – 1894)
3.1. Deutsches Elektronen-Synchrotron DESY Hamburg

- In accordance with the "Berlin Declaration on Open Access to Knowledge in the Sciences and Humanities" DESY supports the open access movement.
- **Rules** for good scientific practice (Regeln guter wissenschaftlicher Praxis)
- **Recommendations** of the DFG „Vorschläge zur Sicherung guter wissenschaftlicher Praxis“
- **Regulations for publication** according to DESY operational procedures and company rules (Geschäfts- und Betriebsordnung GO/BO)

apply for all DESY staff members,
and to all guests who use the DESY facilities.

3.1. Deutsches Elektronen-Synchrotron DESY Hamburg

Decision of the Directorate on August 25th, 2006

- All scientists at DESY are asked to
  - transfer preprints of their approved publications to publicly accessible electronic print archives,
  - preferably publish in open access journals,
  - see to it that, when submitting articles for publication in other journals, DESY retains the right to make the article accessible in its latest version and in electronically readable form, e.g. in an institutional repository.

- The DESY makes its own publications accessible to the public in an institutional repository.

- Adequate fees for the publication in open access journals will be accepted by DESY.

- The Library administered the OA publication fund of DESY.

Text by Dr. Martin Köhler
3.2. Publishing @ Jülich: Framework

- Publication Guidelines of Forschungszentrum Jülich GmbH (Veröffentlichungsrichtlinie) since ~1960s, new ed. 01/2013
  - Rules of good scientific practice
  - Data archival

- Approval of publications:
  - Singed prior to publication (institute directors, authors)
  - Agree to follow good scientific practice
  - No conflicts with possible patenting
  - Appropriate data archival

- Publishing house

Text by Dr. A. Wagner
3.2. Publishing @ Jülich: Framework

✈ Guideline 01/2013

Now mandatory:
Open Access for all publications of the publishing house JuSER:
- Service of the library
- Preprint of every paper for Open Access and archiving
- Final version PDF for archiving

Funding via library
- Corresponding Author is from FZ Jülich
- Gold Open Access Journal (no hybrids)
- All other charges involved

❖ Central funding of all electronic and print publications as a library service

Text by Dr. Wagner
3.3. Publication workflows @ GSI

The library supports the publication process especially to:

- **Service** to the GSI institutional repository (in approval; OA visibility)
- **Services** to metadata for the GSI institutional repository and the evaluations
- **Advisory service** (copy rights, image rights...) in connection to the legal department
- **Information** to open access (esp. questions to the Helmholtz contracts)
- **Handling** of supplementary materials (program code...)
- **Handling** of receipts (only in case of missing groups’ regulations)
- **Green OA** via Alliance licences is considered in close connection to the library of FZ Jülich

- **No central OA funding**
HZDR Board decision 06.04.2011:

OA publication fees have to be paid by project fund and if not available by the central publication fund, administrated by the library.

- The author decides to publish in Open Access.
- The author requestes the absorption of costs.

- Complete electronic workflow: publication database of HZDR
3.4. Helmholtz-Zentrum Dresden - Rossendorf

- Approval of cost covering:
  - Corresponding author is from HZDR
  - The journal is a Gold Open Access Journal (no hybrid).

- Absorption of cost
  - Department „Research Programs and International Projects“ checked whether project budget is available. If yes → fees paid by project budget
  - If a project budget is not available and for all other publications the library absorbs the OA publishing fees.

  ➢ Central OA funding as a library service
3.4. Helmholtz-Zentrum Dresden - Rossendorf
